On 25 November 1954, there was no air activity at Rechlin-Laerz airfield. A total of 31 MiG-15s or U-MiG-15s were counted at the field, including 4 at the eastern edge of the field along the runway, 18 at the western edge of the field along the runway and 9 in the southwestern corner of the field. The southern edge of the landing field could not be reconnoitered because of fog.

Comment. Rechlin-Laerz airfield is believed to be still occupied by a fighter division headquarters and two fighter regiments.
